Background

Literature Review

Coordination & Health Systems Strengthening in Countries under Stress

“Development of **guidance** for improved **coordination of development and humanitarian partners** around resilient **health systems strengthening** in fragile countries”

“What does the **literature evidence** tell us about what works in **health systems strengthening** and **actor coordination** in countries with **fragile environments**? How? Why?”

Objectives of the Report

Multi-Disciplinary Evidence on Coordination and Health Systems Strengthening (HSS)
in Countries under Stress: A literature review and some reflections on the findings

UNDERSTAND

- Drivers of health systems strengthening interventions in fragile or challenging operational environments
- Mechanisms driving government stewardship, engagement with non-state-actors and accountability

EXPLORE

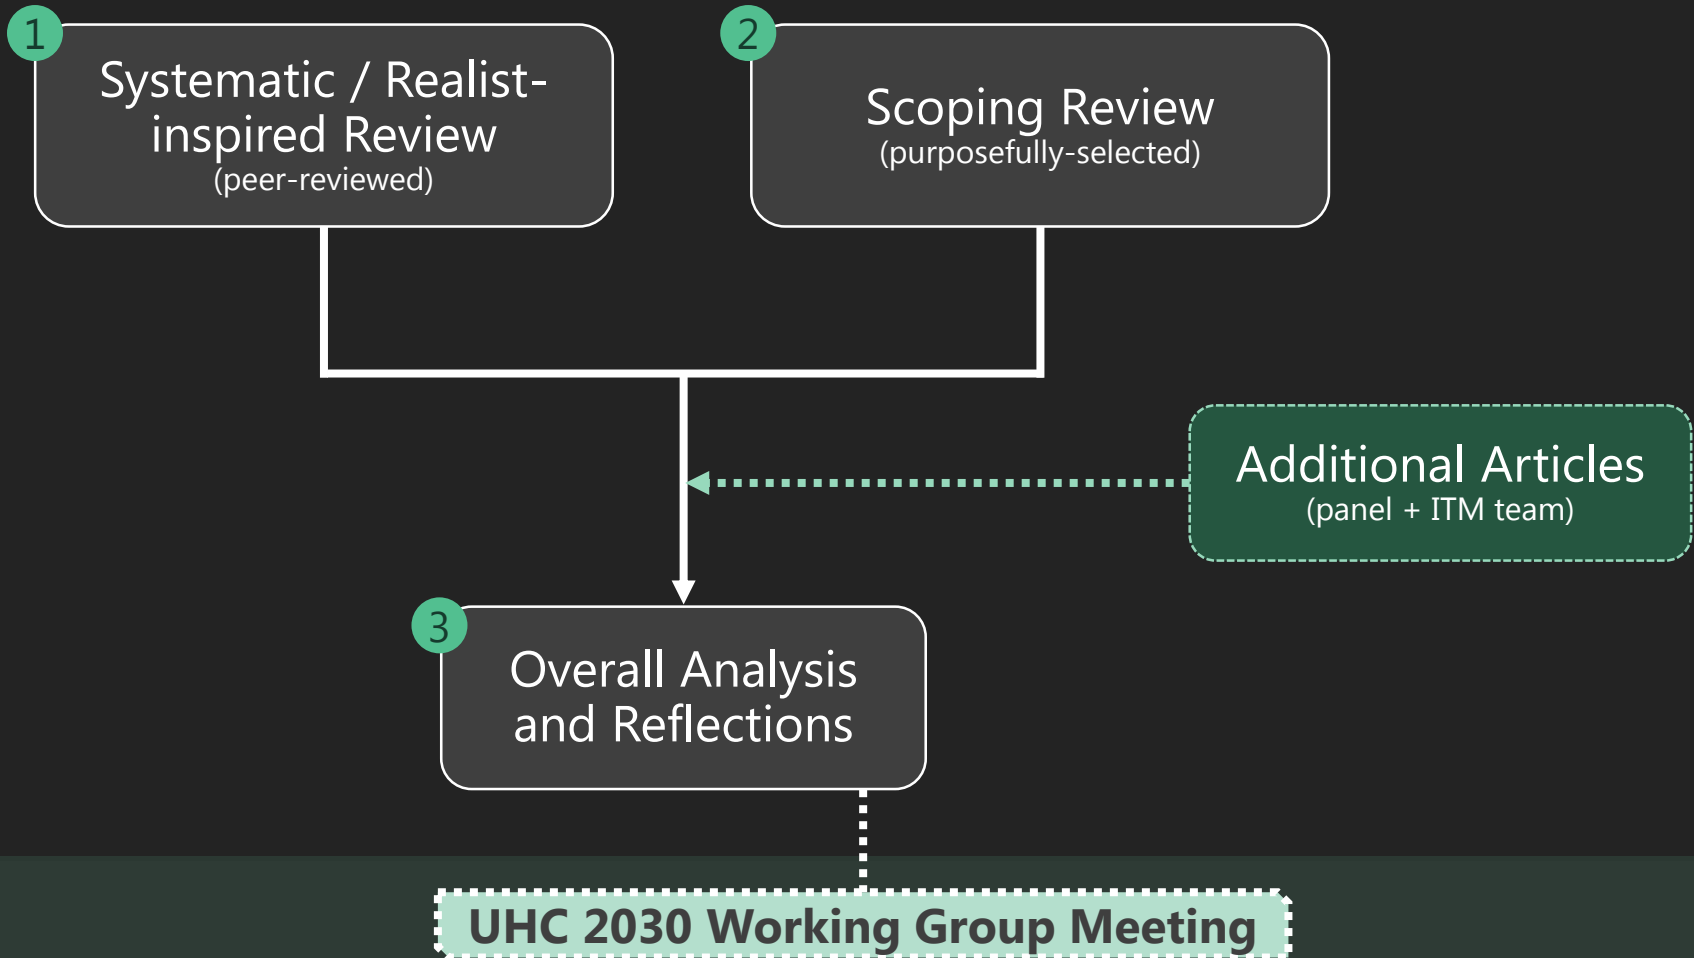

- Humanitarian actor coordination and modes of operation
- Configuration and coordination between actors
- Modes of operation in the transition phase from relief to development

Methodology

3 PHASES

Types of Interventions

FINDINGS OF THE STUDY

Rapid Health Service
Delivery

Health Systems
Strengthening

Actor
Coordination

Types of Interventions

FINDINGS OF THE STUDY

Phase I: Systematic Review

n = 105 studies

Phase II: Scoping Review

n = 99 studies

- Health Systems Strengthening
- Rapid Health Service Delivery
- Actor Coordination
- Others

Rapid Health Service Delivery

FINDINGS OF THE STUDY: TYPES OF INTERVENTIONS

Some recurring interventions:

- Basic Package of Essential Health Services
- Contracting out to NGOs
- Strengthening community-based health workers

Health in humanitarian crises 1

Evidence on public health interventions in humanitarian crises

Karl Blanchet, Anita Ramesh, Severine Frison, Emily Warren, Mazeda Hossain, James Smith, Abigail Knight, Nathan Post, Christopher Lewis, Aniek Woodward, Maysoon Dahab, Alexander Ruby, Vera Sistenich, Sara Pantuliano, Bayard Roberts

Logos for WHO, UNHCR, and CrossMark are visible in the top right corner.

ReBUILD Consortium Research for stronger health systems during and after crisis

Health systems during and after crisis: evidence for better policy and practice | Brief 8

Developing health system research capacity in crisis-affected settings: why and how?

Brief prepared by **Sophie Witter, Benjamin Hunter and Sally Theobald** June 2017

Health Systems Strengthening

FINDINGS OF THE STUDY: TYPES OF INTERVENTIONS

VARIOUS HSS INTERVENTIONS

“These different health systems elements **complement each other** and needs are highly **context dependent**”

Health Systems Strengthening

EXAMPLES OF HSS INTERVENTIONS

International Actors, GHIs, Vertical Programs	Financing	Human Resources	Governance	Health Service Delivery
<ul style="list-style-type: none"> ▪ Cash-based support ▪ Emergency funds ▪ Vertical programs 	<ul style="list-style-type: none"> ▪ Fee-exemption policies ▪ Performance-based financing ▪ Multi-donor trust funds 	<ul style="list-style-type: none"> ▪ Strengthening workforce performance ▪ Equitable HRH distribution ▪ Training of CHWs 	<ul style="list-style-type: none"> ▪ Community scorecards ▪ District-level management & planning 	<ul style="list-style-type: none"> ▪ Basic package of health services ▪ Operational tools ▪ Health facility assessment
<p>“Government leadership is crucial”</p>	<p>“Be mindful of system-wide effects and health system preparation”</p>	<p>“Capacity building at mid-level”</p>	<p>“Issues of legitimacy of actors and interventions”</p>	<p>“Gaps in monitoring and evaluation (ie HMIS)”</p>

Actor Coordination

FINDINGS OF THE STUDY: TYPES OF INTERVENTIONS

EXAMPLES OF ACTOR COORDINATION INTERVENTIONS

- Sector Wide Approach (SWAP)
- Sector Wide Management (SWIM)
- Inter-Sectoral Partnerships
- Pooled Funds
- Poverty Reduction Strategy Papers (PRSPs)
- Global Health Partnerships
- Advocacy Coalitions
- Transitional Programming
- Health Clusters
- Financing Mechanisms (e.g. contracting)
- Programme Grant Agreements
- UN Development Assistance Frameworks
- Country Programs/Instruments
- Inter-Agency Consultations and Coordination Committee, Bilateral Meetings

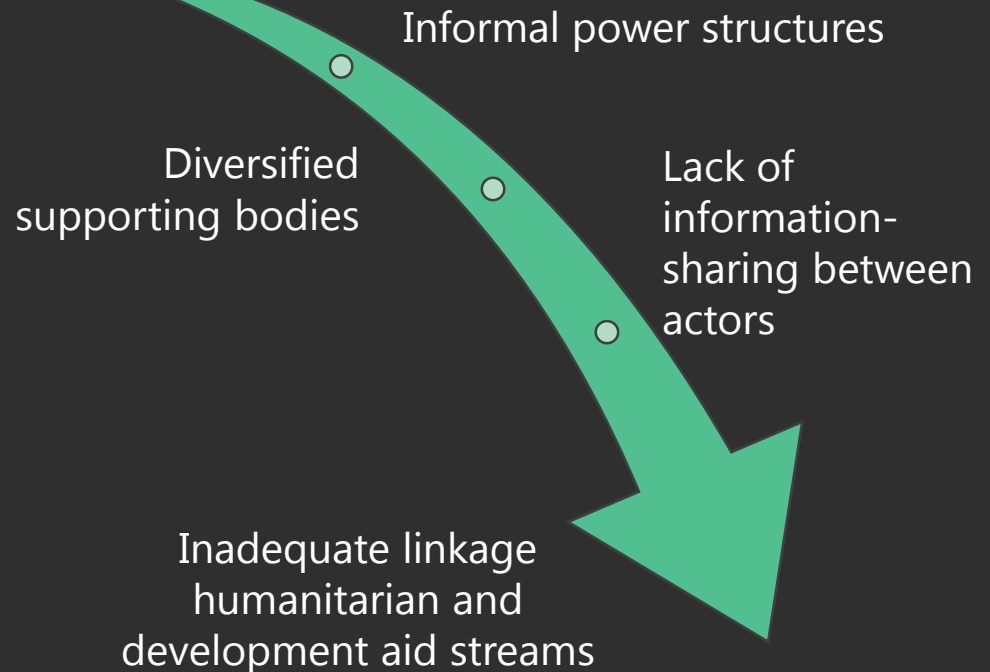

Actor Coordination

FINDINGS OF THE STUDY: TYPES OF INTERVENTIONS

Variety of service delivery models, decision-making and funding dispersion

“One sees a lack of alignment and coordination between government, donors, and humanitarian and development actors.”

Contextual Factors

WEAK

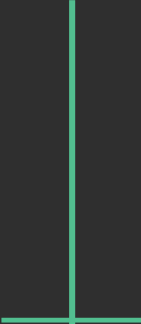

LITERATURE
EVIDENCE BASE

Weak evidence in published public health literature due to:

- 1) limited research capacity
- 2) challenges relating to insecurity
- 3) low prioritisation of research

Understandable lack of **solid** evidence,
given subject and context

“Unfortunately, the circumstances that make information collection so important are precisely those that make it extremely difficult to do.”

Clarke, Paul Knox, and James Darcy. “INSUFFICIENT EVIDENCE? The Quality and Use of Evidence in Humanitarian Action: ALNAP Study.” London, 2014.

Institutional
interest

Local Perspective

*“Local partners treated not as true partners
but as sub-contractors”*

**“Illiteracy” on
demand side:**

Lack of capacity
to grasp local
ideas?

**Fear of
participation:**

Why would
opinions be
volunteered?

**Opportunistic
reasons:**

Publication
bias?

Legitimacy and Accountability

Issue of growing importance:

- Upward & downward accountability
- Expulsion, sustainability and equity are global issues
- In a multipolar world, values are contested

Legitimacy and Accountability

“Accountability is not going to be improved through more ‘tweaking’ with technical or procedural fixes. It requires **a change in mind-set** to acknowledge that each and every person affected by and engaged in humanitarian crises has different roles and responsibilities to play, and that they need to be accountable to one another as well as to the collective goals”

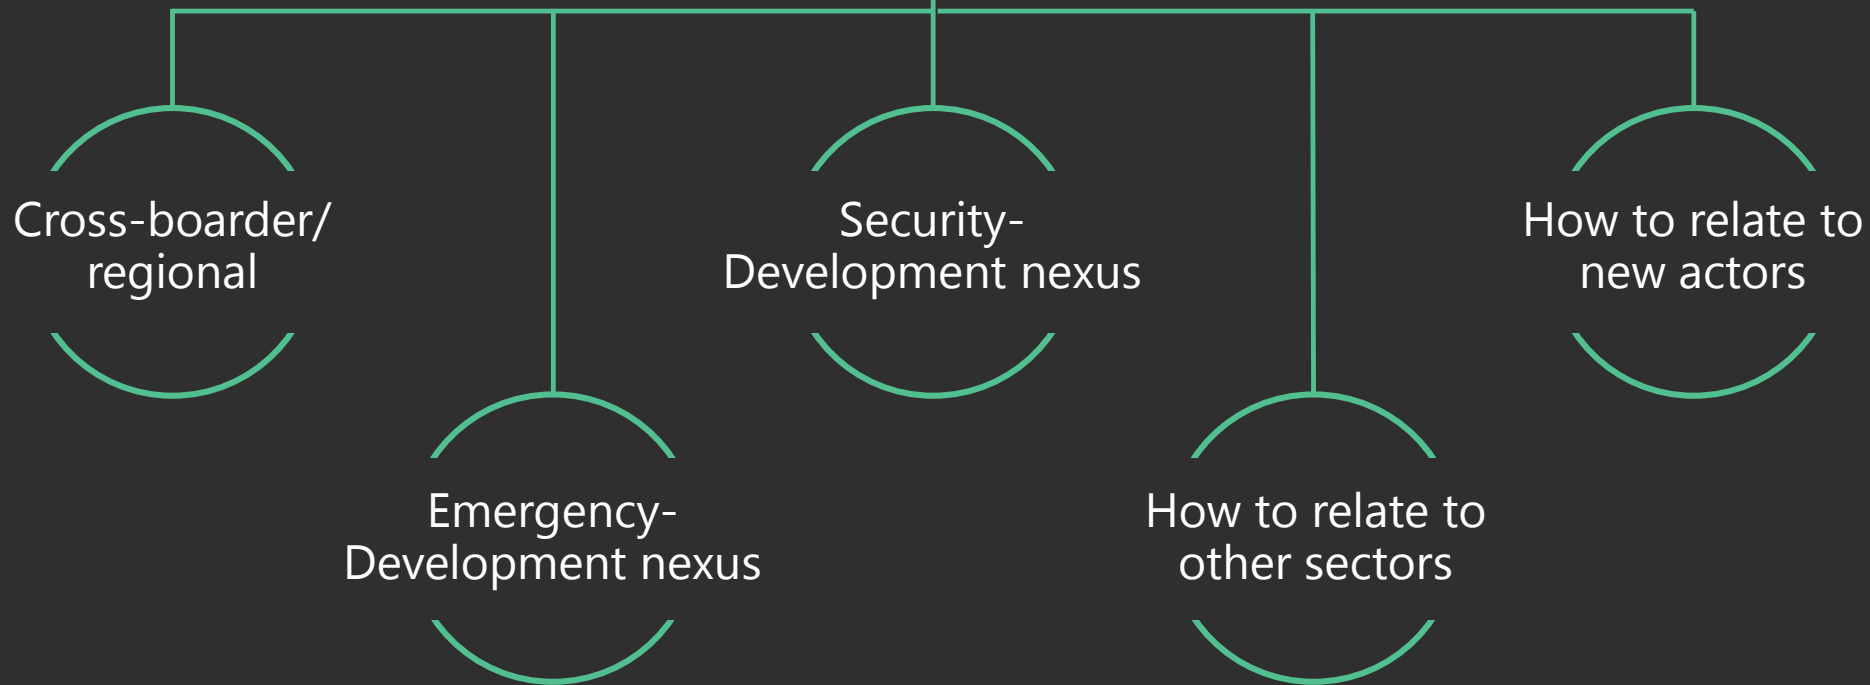

CHS Alliance, “On the Road to Istanbul: How Can the World Humanitarian Summit Make Humanitarian Response More Effective?”

Legitimacy and Accountability

- 1) of all actors and their intentions?
- 2) of New Actors?
- 3) of Coordination Mechanisms?
- 4) of Global Politics?
- 5) of Universal Values?

Some of the challenges in the [Humanitarian] Health System

Security-Development

NEXUS

The nexus between counter terrorism, development and Agenda 2030 brings together CdM Members and decision makers from the EU and the UN

September 14, 2017

Former Presidents and Prime Ministers Joyce Banda (Malawi), Hamadi Jebali (Tunisia), Olusegun Obasanjo (Nigeria) Mary Robinson (Ireland) and Danilo Turk (Slovenia) will engage next Tuesday 19th of September in New York in a debate about the critical nexus between security and development, with high level intergovernmental policy makers from both the European Union and United Nations

- After 9/11, security became priority (funds follow)
- The military is part of humanitarian agenda
- Aid = politics
- Motives are seen as suspicious
- Governmental inclusion more problematic

Emergency-Development NEXUS

There are lots of recommendations to improve LRRD

How to move forward?

Wider

P E R S P E C T I V E

Tailored
Response

Knowledge
Management

High-intensity Conflict Settings

Lack of basic infrastructure

Logistics

Lack of access

Too few aid organisations in area – those which are there feel overburdened

High population movements

Low Intensity Conflict Settings

Funding scarcity

Differing priorities state vs INGOs

Unsustainability of programs

Overstretching of INGO portfolios to get funding

Low capacity local actors and high rotation of international staff

Post Conflict Settings

INGOs and competition are overwhelmed

Culturally inappropriate programs

No exit program

Lack of basic infrastructure

Political sensitivities below surface that cannot be openly considered 'conflict' or reported about

CONFIRMED IN ALL MODELLING: DIFFERENT SETTINGS, DIFFERENT RESPONSES

HIC

High-intensity Conflict

Mobility

Adaptive management

Lowering expectations

Strictly defining projects

LIC

Low-intensity Conflict

Groundedness

Prevention

Working with civil society groups

Exit programs

WORLD HUMANITARIAN SUMMIT

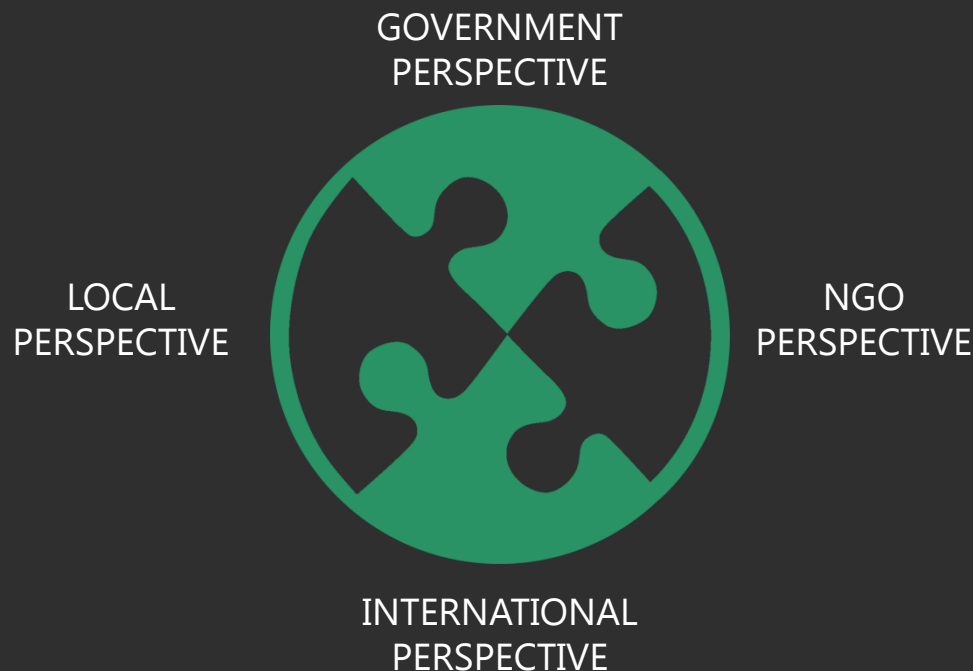

“The notion of **collective outcomes** has been placed at the centre of the **commitment** to implement the New Way of Working.” (WHS, 2016)

Guidance for practitioners?

"joint sense-making"

COLLECTIVE THINKING

New approaches / practices:

- Problem-driven iterative adaptation
- Capability traps
- Applying complexity thinking
- Collaborative intelligence

How to move forward?

The Nature of Evidence, Data & Research

EVIDENCE

- Strengthen the quality of evidence
- Not always 'scientific evidence'

DATA

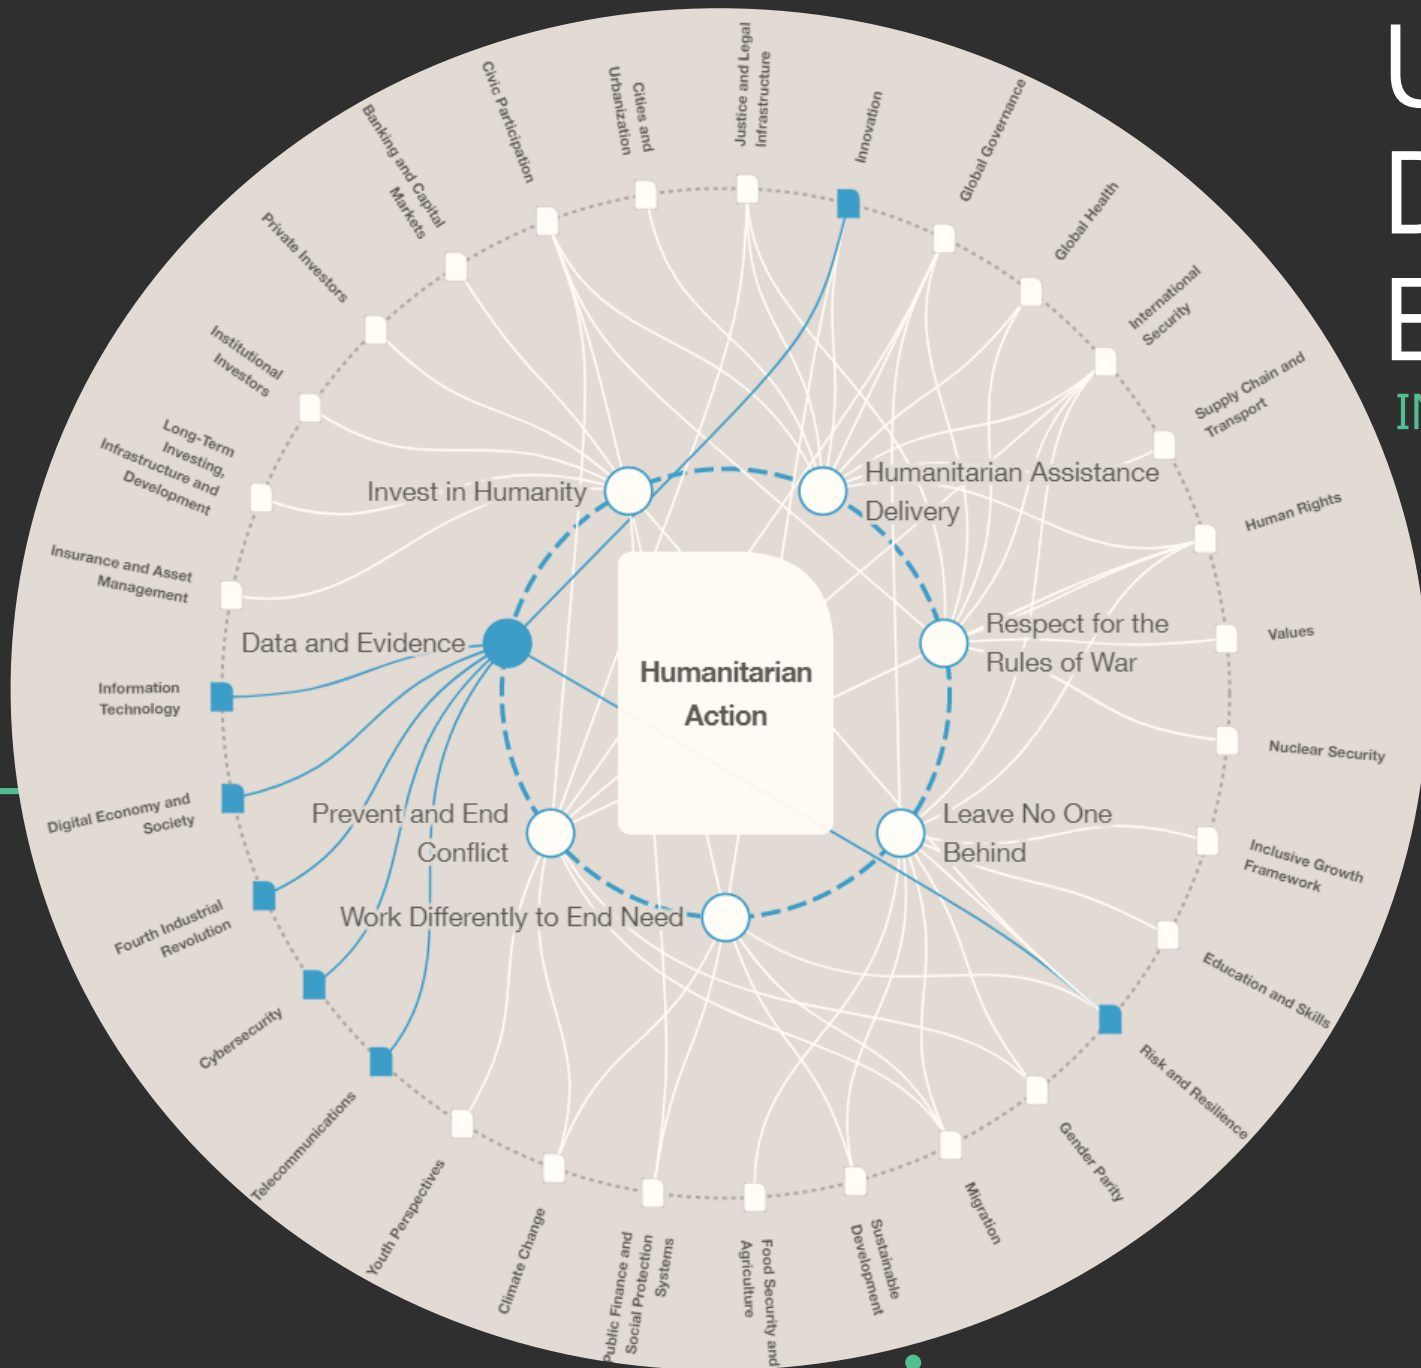

- Better use of IT in research and service delivery
- Utilizing social media

RESEARCH

- Apply apt research designs and evaluation methods
- Utilize action research

Using Data and Evidence IN HUMANITARIAN ACTION
