

Enabel's model and ambitions in social protection in health

December 2020

Agence belge de développement

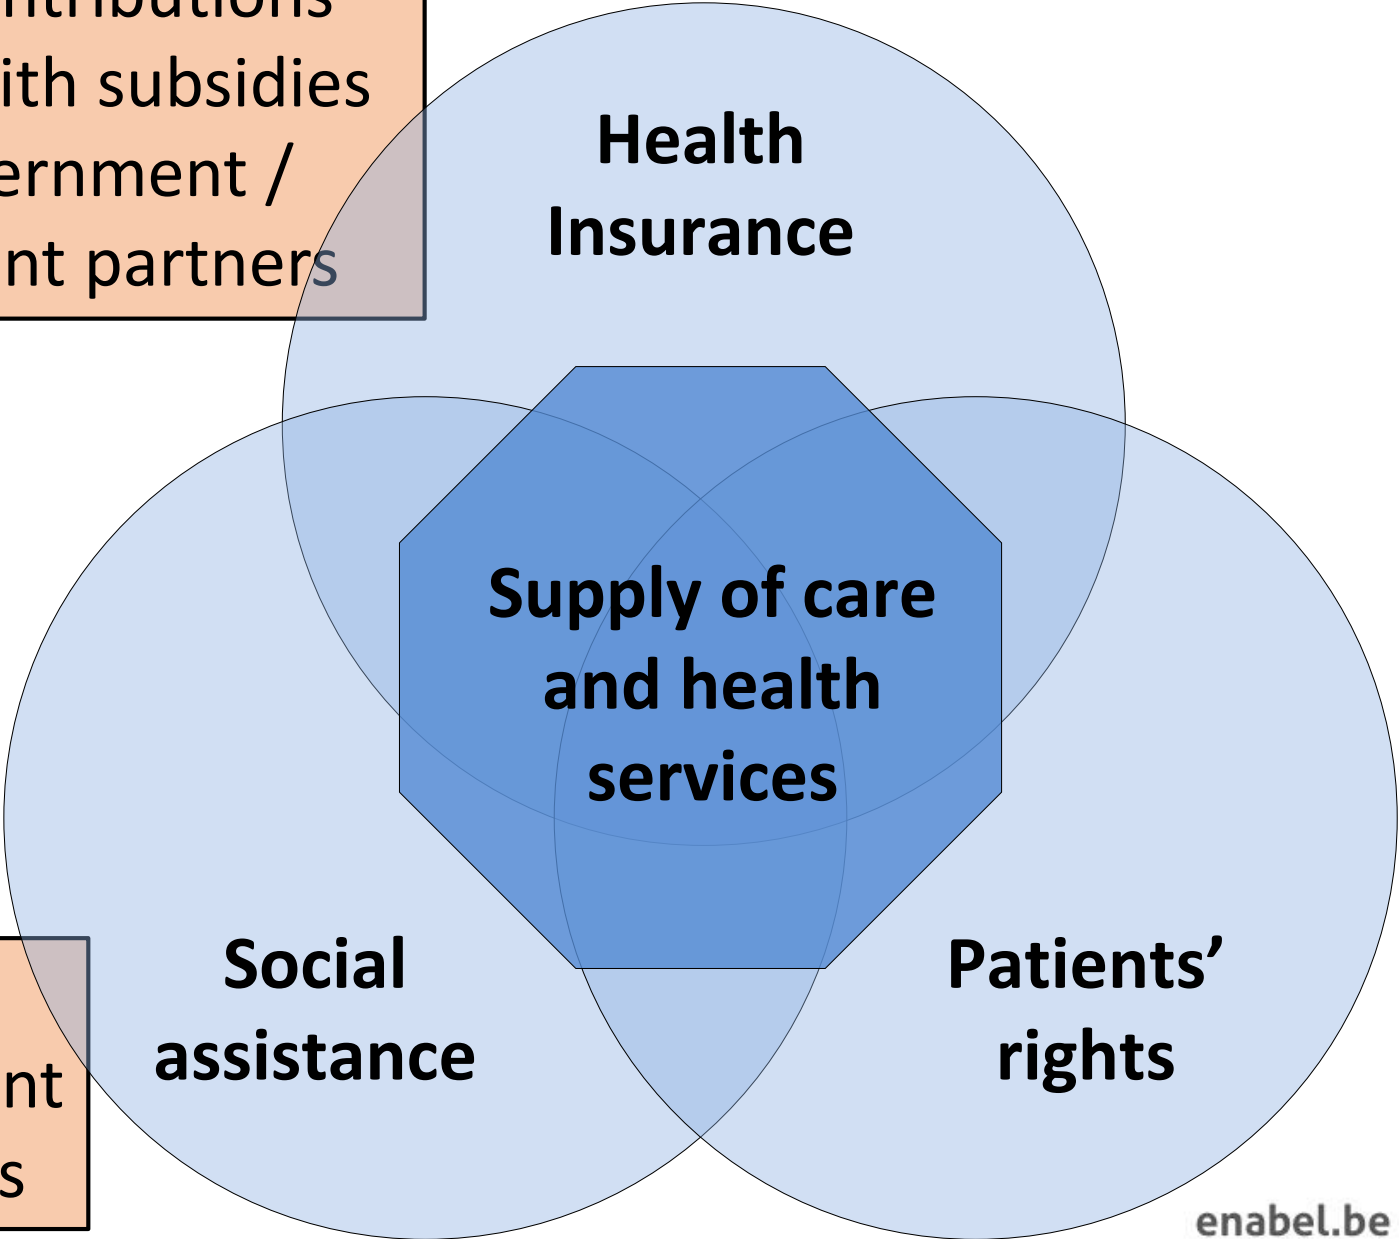

enabel.be

People's contributions combined with subsidies from Government / Development partners

Universal health coverage

Contribution 100% subsidised by Government / Development partners

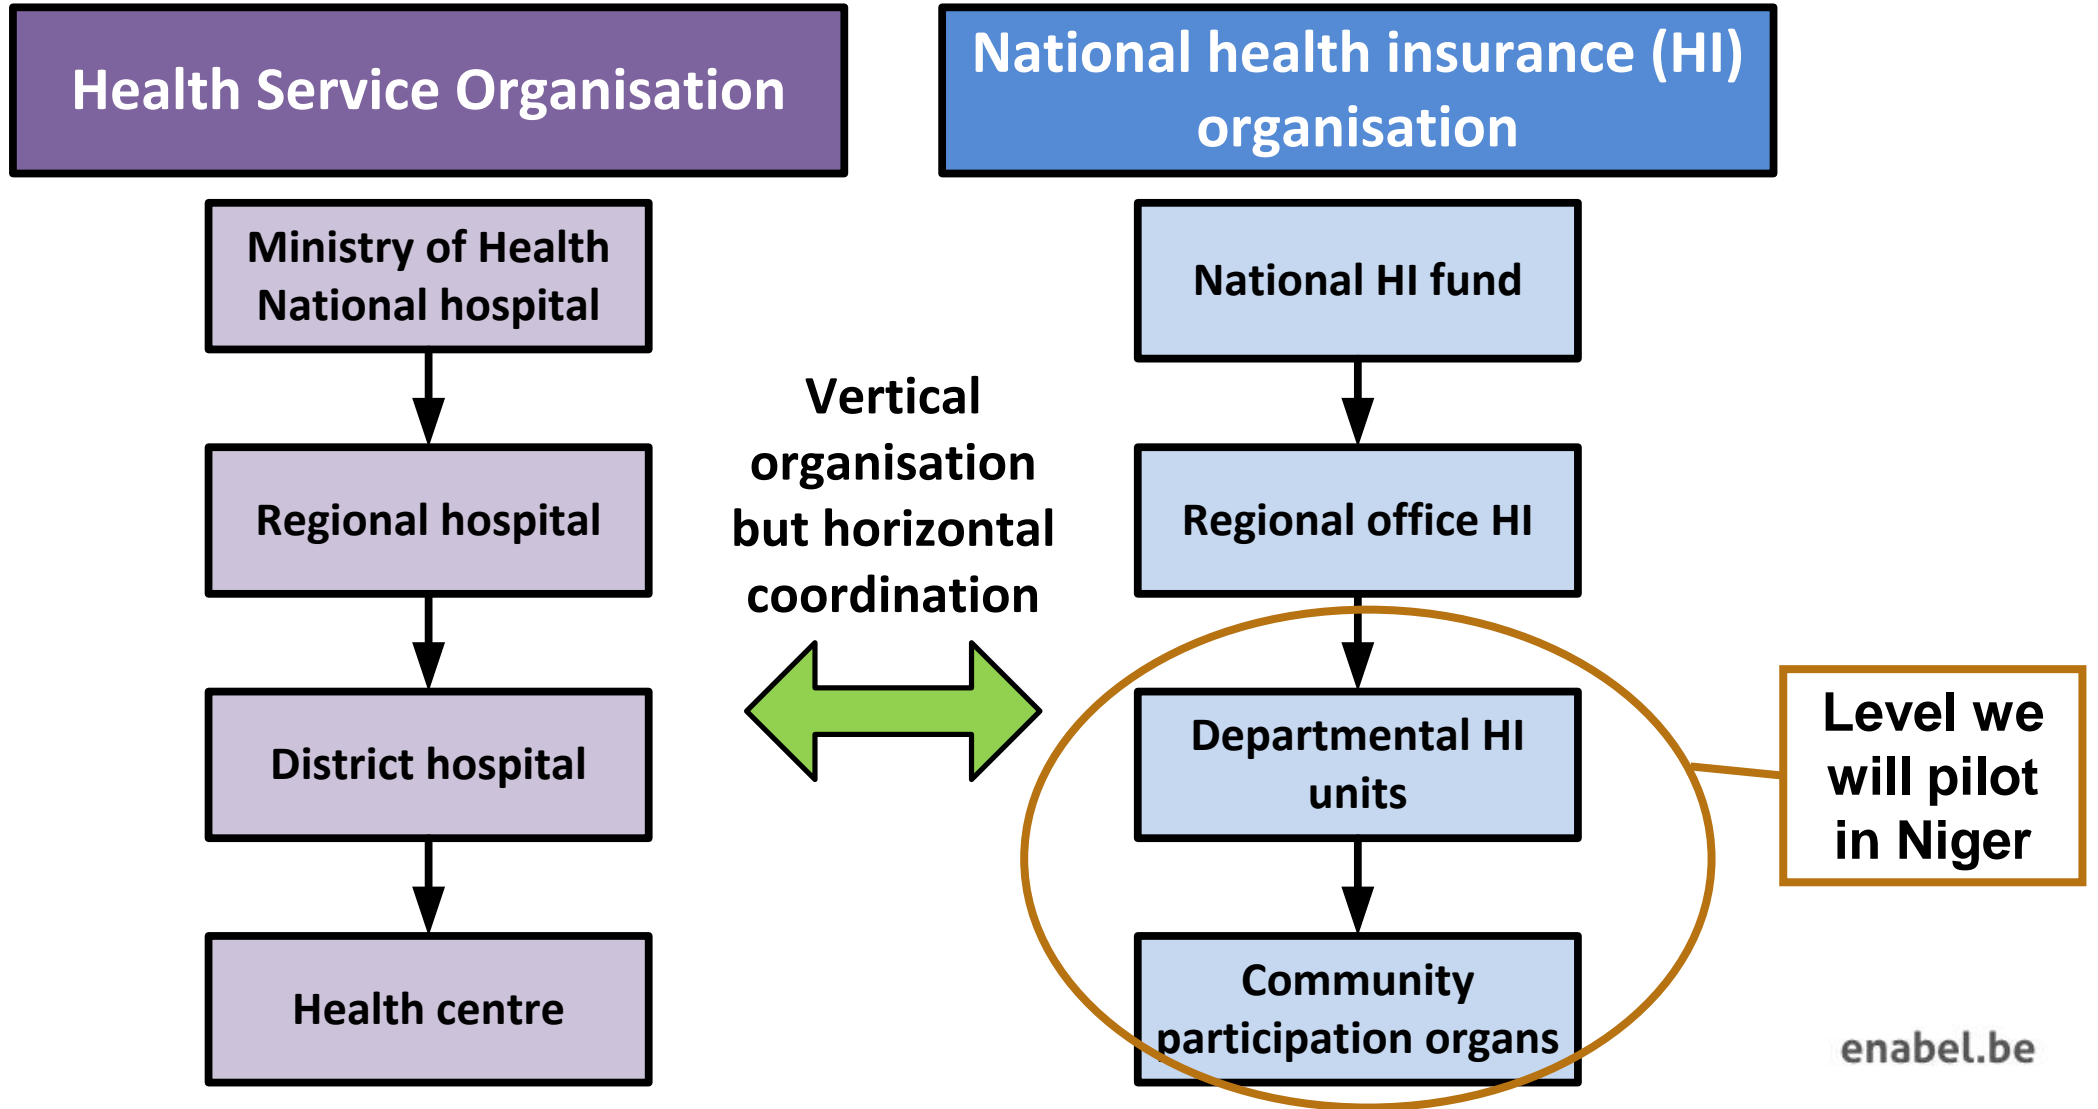

UHI – Social Protection in Health

- UHI: Universal Health Insurance = **Large scale, professionalised**, in principle **‘mandatory’** and **Public**
- **Concentrating on the informal sector:** no solidarity possible with formal health insurance
- Applied in Senegal; ongoing in Niger and Mauritania (EU project); Preparatory study in Guinea (EU?), and others

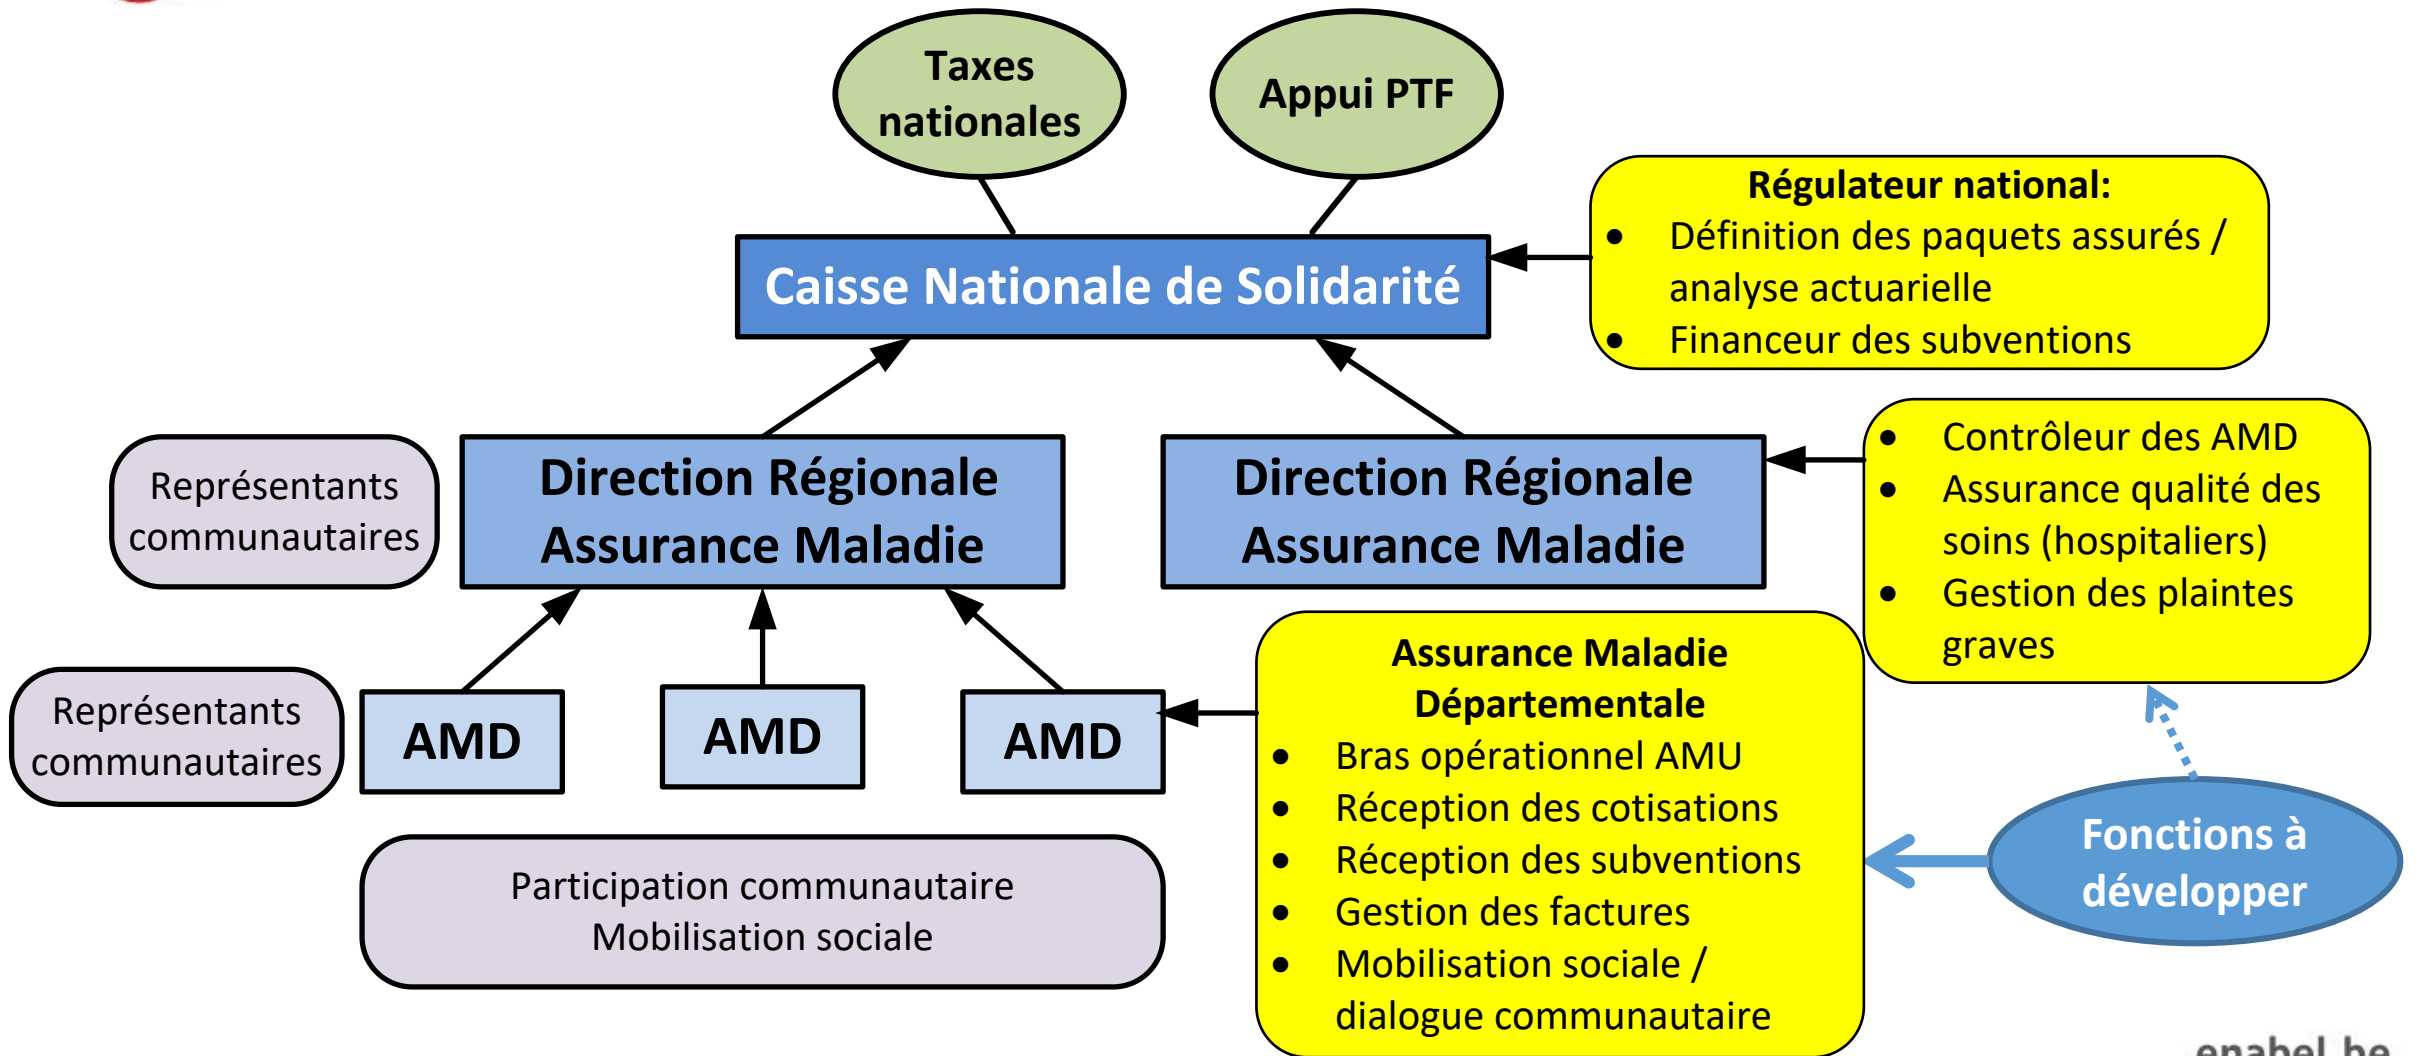

The model : inevitably a **tiered system**

Model proposed in Niger

The possible role of ANG / International NGOs

Digital difficulties

- No proper accounting system in most public facilities
- No automatic generation of invoices
- No communication between OpenClinic and MASsanté
- Niger: start with accounting system (TOMPRO), but no invoice generation
- Niger will use OpenImis for its health insurance system
