E-Health Academy

New Partnerships –

Better Results?

30th of April 2019

Panelist 3 :
The health professional :

1. **Certificate in Applied Health Informatics (CISA)**

- **In partnership** with ULBU (Université Lumière)
- **13 modules**: Organization of health system, IT Network, Database management, applications and classifications used in health sector,…
- **Methodology**
  - Expectations of participants
  - Training and Evaluation
  - Evaluation made by participants
- **Challenges**
  - Heterogeneity of participants: public-private, IT-Clinicians, Urban-rural, health sector or not…
  - Large demand (class of 50 participants) and short training time

Panelist 3 :
The health professional :

1. **Certificate in Applied Health Informatics (CISA**)

- **Comments of participants**:
    - Interesting training (opening of mindset)
    - Combination of modules, which allows to bring more knowledge to people from diverse fields (MoH, Hospitals, ICT, …)
    - More exercises and visit sites that already use patient data management tools
    - How to go far and perform in the Medical informatics?
    - Need to strengthen partnership between Belgian and Burundian universities
