Lessons learned from COVID-19

- 1 A new pathogen and pandemic, but a **repetition of past mistakes re health justice.**
- 2 **Scarcity is the enemy of equity.** Social dilemma: governments prioritized national public health interests to ensure access to medical countermeasures.
Production proximity mattered.
- 3 **Political momentum for structural change re the Global Health Architecture for PPR...** but by whom, for whom and for how long?
- 4 **The UHC-PPR divide is artificial.** UHC is a prerequisite, also for PPR.
- 5 **BE and EU took up responsibility, but we can still do more.**
